## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The amendment after final filed on May 19, 2006 has been carefully considered in view of the specification and the drawings of this application with respect to the references of the record. Claims 1-2, 7-9, 14, and 19 have been cancelled by this amendment. Claims 3-6, 10-13, and 15-18 are pending on this application. Claims 3-6, 10-13, and 15-18 have been carefully considered in light of the specification. The references of the record either taken alone or in combination fail to teach or suggest that at least two types of data transfer systems are prepared for the serial bus, a data transfer system is selected by a parameter which has been set in the numerical control system, a plurality of servo motors are connected to the numerical control device with a serial bus by a daisy chain system, each servo amplifier includes means for measuring a frequency of signal change for a predetermined time in a received signal on the serial bus and discriminating a data transfer system on the basis of the measured frequency of signal change, and at least a servo amplifier except of a most downstream servo amplifier in the daisy chain system includes first and second connectors for the serial bus, discriminates a data transfer system of the serial bus in the first connector on the basis of a signal received by the first connector and said discriminating means, and determines a data transfer system for the second connector on the basis of the discrimination result so that a servo amplifier connected to an upstream or a downstream in the daisy chain system is adaptable to a plurality of data transfer systems.
